Test Update Gentamicin Method Change

Effective Wednesday August 17, 2011, the UCH Clinical Laboratory will change to a new method for testing of Gentamicin levels because of supply problems with the current method. The new method uses a Chemiluminescent Immunoassay system.

There will be no changes to current sample type, order names or therapeutic ranges.

Please call Ron Lepoff, M.D. at 720-848-7044 if you have any questions or visit our website at <http://www.uch.edu/for-healthcare-professional/Clinical-Laboratory/index.aspx> for additional information.

Issued: August 16, 2011
